

CARTON ERECTOR FORM 1200 HM / NS

NEW AND INNOVATIVE PACKAGING SOLUTION

Ape Impianti designs and manufactures packaging plants for the beverage industry. The company's philosophy originates from its history: experience and creativity working for the customer, to enable him to be competitive and innovative on the market. Therefore the company has been constantly building brand loyalty and subsequently, Ape Impianti market share has been continuously growing.

Case erecting machine for fully automatic case erection, sealing the bottom flaps with Nordson Hot Melt gluer or by adhesive tape. Simple and sturdy mechanical structure made entirely out of AISI 304 stainless steel. Fast format changeover thanks to hand-wheel adjustments on graduated scales.

Sealing by adhesive tape

Elite case for lying stockage

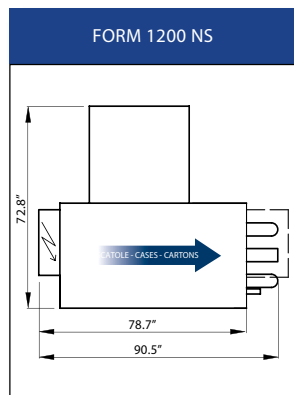

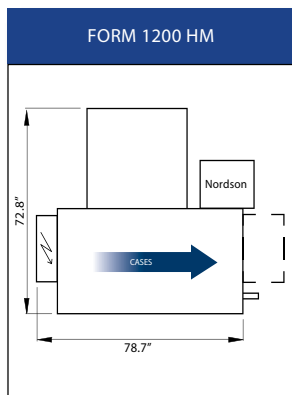

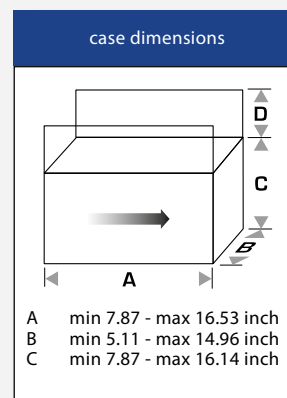

Extra store up to 160 cases

MACHINE CHARACTERISTICS:

- Case erecting machine for output up to 1000 case/h, two versions sealing by glue (HM) or by adhesive tape (NS).
- Case storage capacity 75 pieces with possibility of expansion up to 160 cases (depending on their thickness).
- Control that monitors the presence of cases in the storage.
- Sealing unit of case bottom flaps by adhesive tape (version NS).
- Nordson Hot Melt applicator with gun at 4 nozzles (version HM).
- Available on request, modifications to work elite carton with double long flaps.

Bottles are placed inside elite case vertically by means of traditional machinery and than stocked lying. High resistance against load, even in case of conic-shaped bottles, thanks to the long double flaps
