

FULLY-AUTOMATIC PACKING MACHINE INCA 1300

NEW AND INNOVATIVE PACKAGING SOLUTION

Ape Impianti designs and manufactures packaging plants for the beverage industry. The company's philosophy originates from its history: experience and creativity working for the customer, to enable him to be competitive and innovative on the market. Therefore the company has been constantly building brand loyalty and subsequently, Ape Impianti market share has been continuously growing.

Compact case and plastic crate packing machine with AISI 304 stainless steel frame and radial movement which allows a smooth and balanced bottles insertion. The machines can be completed by multi-format equipments, row loaders for non-cylindrical bottles and can be supplied in crates-unpacking version.

Fully-automatic packing machine to insert bottles into American type cartons with or without pre-glued inside partitions and into plastic crates or plastic crate.

Radial movement of the head, controlled by an inverter and with speed variation over the various phases of the operating cycle.

Complete with bottle storage table with bottle presence inspection device, carton conveyor, AISI 304 stainless steel conveyor belts and belt supports. Machine designed to use with multiformat equipments processing bottle diameters from 62 mm to 108 mm.

Special case centring funnels permit to process cases with or without inside partitions with maximum care for bottle labels.

Format changeover is simple and requires just a few minutes thanks to adjustable equipment and carriages with graduated scales.

Multiformat separator

Multiformat pick-up head

Centering funnels for a cases with preglued partition

MACHINE CHARACTERISTICS:

- Automatic packing machine to insert bottles into case or plastic crate.
- Radial movement of the head, controlled by an inverter and with speed variation over the various phases of the operating cycle.
- Complete with bottle storage table with bottle presence inspection device, carton conveyor, AISI 304 stainless steel conveyor belts and belt supports.
- Machine designed to use with multiformat equipments processing bottle diameters from 62 mm to 108 mm.
- Special case centring funnels permit to process cases with or without inside partitions with maximum care for bottle labels.
- Format changeover is simple and requires just a few minutes thanks to adjustable equipment and carriages with graduated scales.
- Output: 5000 bph

output	450 cph
installed power	2.7 HP
6 atm air consumption	100 NI/min
electric absorption	5 A
weight	2204.6 Lbs
